

Variable Speed Drive (VSD) Pressurised Pump System / Booster Pump System

Variable Speed Booster Pump System with redundancy.

Feature of this system :

Variable speed

- Inverter powered motor drive system. This will control the speed of the motor according to the required set pressure. Therefore it can keep the electrical usage to minimum.

Fully Automatic

- automatic start and stop the pump

Redundancy

- only one pump is working at a time. If one of the pump spoil, there will be another one ready replace.

Quality piping

- the system comes with quality PPR piping system to ensure the system is leak free.

Silent System

- our system adopt quality pump to ensure the noise level is keep to minimum during the pump operation.

Quality Part

- our system adopt quality part to ensure it always in good condition.

Ready to work

- the system is ready to start working once the inlet and outlet fixed into piping.

Flexible Voltage

- the system can operate with single phase or three phase electricity supply.
